Free, legal, and professional quality
image editing with GIMP

You Can Take It With You

The "DHC Open Source Toolkit" is a sturdy, reliable flash drive pre-packed with a collection of carefully chosen open-source software that can do almost anything, anywhere there's a PC.

Come to a Workshop

Not only have we packed the toolkit with software you'll love, we've packed this semester with workshops where we'll teach you to use all of the programs!

The Open Source Toolkit - available as a learning tool to workshop participants - is a project of the IUP Center for Digital Humanities and Culture with the support of the Department of English and the College of Humanities and Social Sciences. For more information on the toolkit, workshops or becoming involved in the DHC - visit our website: www.iupdhc.org
